If you are not a technical person, you will need to learn the basics of how to use the above-mentioned software. These software are quite simple to use. Ensure you or your kids sit in a quiet place and there are no distractions. It will improve the overall the capacity to absorb knowledge and improve the learning performance. For kids its recommended to setup the computer where parents can monitor them easily. It is seen that with distraction and less parental control kids waste more time. The sitting place could be your dining or lounge area. Monitoring is important to ensure kids are not playing or losing focus. With remotely held classes their tutor has less control over the students.

Parent's help is needed to control kids if they are not cooperating.

Ask as many questions at this stage

Step 4 – Choosing the right Quran class time and duration

For Kids it is better to choose a class once they have arrived from morning school. Male Adults can choose evening or morning time as they are busy during office hours. The best time for ladies is morning time once kids have gone to school. Picking the best time is not rocket science but ensure the chosen institute are flexible to change class timings with short notice period. You should also be disciplined in attending the class at the chosen time.

Try not to opt for 2 or 3 days per week class specially for starters as this aids in kids to forget the topic. This results in more time spent on revising the subject. 2-3 days per week class is good for students who have already read the complete Quran once. You can start with 5-6 days/week class and after few months reduce it to 3 days/week.

Hifz/Quran Memorization class must be at least 5 days per week. Each class should be 45 mins each. Lowering the class time or days will hugely increase the overall time to complete the course. It can take few months to years to complete the course. Learn more on what factors contribute to complete the course: <https://learn-quran-kids.com/how-long-does-it-take-to-read-quran-for-kids/>

Choose the time which is best for you to learn and assign maximum class duration you can manage

Step 6 – Follow a learning Trail

Have a clear learning path helps you in the long learn.

- Quran Recitation > Quran Translation
- Quran Recitation > Quran Memorization
- Quran Recitation > Quran Tafsir
- Quran Recitation > Arabic Learning

Note: Islamic Education courses can be taken in parallel with Quran Recitation

As you can see Quran recitation course is the pillar as it sets the base for other courses. Once this course is completed you can easily opt for any of the other course.

Step 7 – When to switch Quran institute?

Choosing the right Quran institute is important as switching again and again frustrates students. They may be subjected to repeating the topics again or strengthening weak areas which could be boring for them. Once chosen, you should stick with an institute and give more time even if it means slow performance. You may opt to switch once certain mile stones are met e.g. Qaida is completed, Kids can read Quran on their own etc. Switching mid-ways is never beneficial.

Patience is the key and parents may loose it as they are not finding performance as they had expected. Ideally there should be no pressure or competition in learning Quran. Instead of putting pressure, parent should put incentives in front of kids to make it exciting for kids to achieve milestones. Note that each kid is unique and may take few months to years to learn.

Learning process should be treated as a a journey not a goal
